PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience in Data Engineering, ETL, Data Migration and Data Lake solutions. Proficient in Python, SQL and AWS Services. Experienced in data pipeline development, data validation, data quality checks, and workflow orchestration. Knowledge of Apache Spark, Snowflake, Jenkins, Prometheus, and Grafana. Strong analytical and problem-solving skills and a willingness to learn and work across data and cloud technologies.

SKILLS

Languages	Python, SQL
Data Engineering	ETL, Data Warehousing, Data Lakes, Data Migration, Data Validation
AWS Services	Amazon S3, Glue, EMR, Athena, IAM, EC2, Lambda, EBS, ELB
Data Warehousing	Snowflake
Workflow Orchestration	Apache Airflow
Data Visualization	Power BI
Monitoring Tools	Amazon CloudWatch, Jenkins, Prometheus, Grafana
Data Integration	Source-To-Target Mapping, Business Requirements Analysis, Data Reconciliation
Project Management	Jira, Confluence, Agile Methodology, Scrum

EXPERIENCE

- Coforge Limited** Greater Noida, India
Data Engineer - Client: TriNet June 2024 – Present
 - Worked on an **enterprise data migration initiative** to migrate data from **EDW platforms to an AWS Data Lake**, supporting scalable data ingestion, transformation, and validation workflows.
 - Developed and maintained **metadata-driven data** processing configurations for managing source-to-target mappings, load requirements, and processing parameters across multiple datasets.
 - Worked with **Amazon S3** for data storage and organized data across defined data-processing stages to support downstream analytics and reporting.
 - Created and maintained **AWS Athena tables** to enable querying and validation of datasets stored in Amazon S3.
 - Analyzed **BRDs and functional requirements** to understand business rules, **source-to-target mappings**, transformation requirements, and data validation criteria.
 - Configured and monitored **Apache Airflow DAGs** to orchestrate data processing workflows and ensure successful execution of scheduled jobs.
 - Performed source-to-target validation, data reconciliation, and **data quality checks** to identify discrepancies across processing stages.
 - Monitored **daily data loads, investigated pipeline/job failures**, and supported issue analysis and root-cause identification during data processing.
 - Supported testing, defect resolution, and post-production validation to **ensure data consistency** and pipeline reliability.
 - Collaborated with cross-functional teams to troubleshoot data issues and support timely delivery of data engineering requirements.
- Celebal Technologies** Remote
Data Engineering Intern May 2023 – Aug 2023
 - Worked on a basic data engineering tasks involving **data extraction and transformation** using SQL.
 - Created and managed simple database tables for storing ingested data.
 - Basic **SQL queries** to explore datasets and understand data structure.
 - Performed initial **data checks such as null checks** and duplicate identification.
 - Documented dataset details and maintained basic metadata for reference.
 - Observed and followed basic data handling guidelines while working with datasets.
 - Gained exposure to **data pipeline** fundamentals and data engineering best practices.

EDUCATION

- Kalinga Institute of Industrial Technology** Bhubaneswar, India
B.Tech, Computer Science Engineering; CGPA: 8.44 Aug 2020 – May 2024
- Jawahar Vidya Mandir, Shyamali** Ranchi, India
CBSE Senior Secondary (XII); 92% April 2019 – April 2020
- DAV Public School, Bariatu** Ranchi, India
CBSE Secondary (X); 92% April 2017 – April 2018
